Name	James O'Sullivan
Address	O'Donovan Rossa St. Thurles Tipperary E41ND71
Note	<p>I am currently the sole home owner here and the proposed works will and already effect my family. The proposed bus parking space across the road will only hold up to 3 buses at a time. Where will the buses waiting pull up? Currently they double park on the street which could prove to be fatal if this continues. Your parking are is not an adequate solution for the bus collection. I would propose 3 options: Utilise the parking directly outside both the CBS and Ursuline and create bus parking only between 3-4.30 pm. This would create a safe space for the children entering the buses and also reduce some traffic into the town. The second would be to contact the schools for space to pull in and the drivers can collect the students within the school grounds. I have been informed that students are dropped at the schools in the morning. Can this not be done for the afternoon? Finally the Co Op has a major space at the back that is unutilised. Request permission to use area for bus collection. The 2 way system works very well currently for the local business' and myself. There have been no incidents reported. I would like to keep the system as it is. Where are the residents, or people working and entering the local business' going to park with the bus parking taking several spaces? What benefit is the change?</p>
